JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

No quarantinable disease reported in the island during the week.

For the period from September 1 to 10, the city health officer of Habana reports the following operations: 22,249 houses inspected, approximately two-thirds of all dwellings in the city; 13,039 collections of water petrolled by the mosquito brigades; 45,633 cans and bottles removed from private premises; 13,641 linear meters of ditching cleaned, and 6,184 square meters of public lands cleared of vegetation.

Reports from Matanzas—Inspection of vessels—Sanitary conditions.

Acting Assistant Surgeon Nuñez reports, September 7 and 13:

Week ended September 4. Bills of health issued to 2 vessels bound for United States ports.

The health of the city and surrounding country continues good. No quarantinable diseases reported.

Week ended September 11. Bills of health issued to 5 vessels clearing for United States ports in good sanitary condition.

Report from Santiago—Inspection of vessels—House and water-deposit inspection.

Acting Assistant Surgeon Wilson reports, September 8:

Week ended September 4. Bills of health issued to 7 vessels bound for the United States. No vessel disinfected.

No quarantinable disease reported.

The sanitary department reports 3,071 houses inspected, and larvæ found in 5 water deposits.

ECUADOR.

Report from Guayaquil—Plague and smallpox—Vaccination—Fumigation of vessels.

Passed Assistant Surgeon Lloyd reports, August 25:

During the month of July there were 23 new cases of plague in Guayaquil, with 11 deaths; for the same period there were 25 cases of yellow fever with 11 deaths. Nine vessels were fumigated during the month to kill rats and mosquitoes.

During the first 15 days of the month of August there were 12 cases with 3 deaths and 6 cases with 4 deaths from plague and yellow fever, respectively; 16 cases of plague and 2 of yellow fever remain under treatment; 2 vessels were fumigated.

No cases of plague have been reported from other points in the Republic. Four cases of smallpox occurred on a ranch about 10 miles from Guayaquil, the contagion being clearly traced to a place down the coast. One man on this ranch escaped vaccination in rounding up the laborers and later developed the disease and died. A mild case occurred in Guayaquil August 10, and was promptly isolated and vaccination of contacts was enforced. Smallpox is epidemic in Ensenada and vicinity (near Santa Elena) and vaccination is being enforced.
